In this document, you will find out how to update the licence for Transit/TermStar. You are in the right place if you use Transit/TermStar with a standalone licence and want to replace essential hardware components on your computer or want to install a new operating system.

What you should know here

If you replace hardware components on the computer on which you have installed Transit/TermStar or if you install a new operating system, this changes essential characteristics of the computer.

The previous activation key is no longer valid; you have to transfer the licence from the “previous” computer to the modified computer (i.e. to the computer that has the new hardware components or newly installed operating system).

Before replacing the hardware components or before installing the new operating system, you must deactivate Transit/TermStar on the “previous” computer (⇒ "Deactivating Transit/TermStar", page 6).

After replacing the components or after installing the new operating system, you can reactivate Transit/TermStar on the modified computer. You log in to the Activation Center, update the licence and thus generate a new activation key. To do this, use the removal key that you received when deactivating Transit/TermStar on the previous computer. You can use the new activation key to activate Transit/TermStar (⇒ "Updating the licence", page 8).
What you should know here

**Activation key and Activation Center**
To be able to work with Transit/TermStar beyond the 30-day activation period, you must activate Transit/TermStar on your computer. To do this, you require an “activation key”, which ensures that your Transit licence can only be used on your computer. You generate the activation key yourself in the “Activation Center”. It is displayed there as the “Activation code”.

**Site Code and Machine ID**
“Site Code” and “Machine ID” are two codes which Transit/TermStar displays individually for your computer. You require these codes in the Activation Center in order to generate the activation key for the Transit/TermStar installation on your computer.

**Removal key**
Transit/TermStar creates a removal key if you deactivate Transit/TermStar. You can use the removal key in the Activation Center to release the licence that is no longer required. It is requested here as a “Removal code”.

**Licence number and activation key**
Do not mix up the licence number and activation key:

- The licence number can be found in the e-mail containing the licence information that you received from STAR. You require the licence number in order to install Transit/TermStar. The licence number defines the product versions, additional functions and optional filters that you have purchased. For time-limited licences, the licence number also includes the period of time in which you can use Transit/TermStar.

- You generate the activation key yourself in the Activation Center. You require the activation key to activate Transit/TermStar. The key links the purchased licence to your computer.
Deactivating Transit/TermStar

In this chapter, you will find out how to deactivate Transit/TermStar. You are in the right place if you want to replace hardware components or install a new operating system.

What you should know here

Before you change essential characteristics on your computer, you must first deactivate Transit/TermStar. When you do this, Transit/TermStar generates a removal key that you can use to update the licence after making changes to the computer.

Tips for deactivating

Take advantage of other users' experiences by following these tips:

If you have multiple licences: Note down the activation key in advance

In the Activation Center, it may be difficult to recognise which of your licences belongs to the deactivated Transit/TermStar installation. As a result, it may become complicated to update the correct licence.

Therefore, note down a part of the activation key before the deactivation or take a screenshot of the Information about Transit NXT window and print this out.

It is even better if a comprehensible comment about the user of the licence has been entered in the Activation Center during the activation. The Note field in the Activation Center is provided for precisely this purpose.

Keeping the removal key safe

If you do not have a removal key, you cannot activate and permanently use Transit/TermStar after you have replaced the hardware components or installed the new operating system.

You should therefore save the removal key in a file and print it out. Remember to copy the file to an external data medium before you no longer have any access to your previous computer.
Deactivating Transit/TermStar

Carrying out the deactivation

Deactivate Transit/TermStar as follows:

1. Start Transit/TermStar.

2. Click on the information symbol to the right in the ribbon bar. Transit/TermStar displays the following window:

3. Click on **Deactivate Transit**. Transit/TermStar displays the following message:
   Are you sure you want to deactivate the software?

4. Confirm the message by clicking on **Yes**. Transit/TermStar displays the removal key that you can use to release the licence in the Activation Center.

5. Click on **Save as**.
Modifying hardware/operating system of your computer

Transit/TermStar suggests that you save the removal key in the STARRemovalKey.txt file in the My Documents folder. Confirm this file or define another file.

Ensure that you can find the file again when you require the removal key.

We recommend that you also print out the removal key or take a note of it.

6 Select OK to close the Software deactivated window.

7 Close the About Transit NXT window by clicking on OK.

Transit/TermStar is now deactivated. You can use the removal key to update the licence in the Activation Center after you have replaced the hardware components or installed the new operating system. You must therefore make sure that you do not lose the removal key.

Updating the licence

In this chapter, you will find out how to update your licence and thus create a new activation key. You are in the right place if you have deactivated Transit/TermStar and then replaced essential hardware components or installed a new operating system.

What you need here

To update the licence, you require the following:

▲ Removal key

Transit/TermStar creates a removal key when you deactivate Transit/TermStar on your previous computer (→ "Deactivating Transit/TermStar", page 6). You require the removal key to release the licence in the Activation Center.

If you can no longer find the removal key, look for the STARRemovalKey.txt file in the My Documents folder. Transit/TermStar suggested this file during the deactivation. If you confirmed this suggestion, you will find the removal key in this folder.

▲ Login details for the Activation Center

To log in to the Activation Center, you must enter your login details. You can find your login details in the e-mail containing the licence information that you received from STAR.

If you have changed the password, use the new password. If you have forgotten your password, you can have it sent to you by e-mail (→ "Forgotten your password?", page 12).
Carrying out the activation

To update the licence, proceed as follows:

1 Start Transit/TermStar on the modified computer.
   Transit/TermStar displays the following window:

   ![Activate software window](image)

2 Open the Activation Center.
   Click on Go to the Activation Center or open the Activation Center in your browser (http://activate.star-group.net).
   Your browser displays the login page of the Activation Center:

   ![Activation Center login page](image)

3 Enter your login details (Username and Password) for the Activation Center (⇒ "Login details for the Activation Center", page 8).
   Select Login.

4 Click on Orders in the page header of the Activation Center.
   The Activation Center displays your orders and licences:

   ![Activation Center orders](image)
Modifying hardware/operating system of your computer

The Activation Center displays how many licences are available for each product.

In our example (first line): Three licences for Transit NXT Professional

5 In the line for the product that you want to use, click on licenses.

The Activation Center displays the licences that are already in use:

![Activation Center](image)

6 In the line for the licence that you want to update, click on the ☑️ symbol.

The Activation Center displays additional fields:

![Activation Center](image)

7 In the Removal code field, enter the removal key that you received when deactivating on the previous computer (☞ “Deactivating Transit/TermStar”, page 6).

In the Site Code and Machine ID fields, enter the codes, which Transit/TermStar displays in the Activate software window on the modified computer.
In the **Note** field, enter a comment so that you can subsequently track on which computer this licence is being used (e.g. name of the user).

8 **Click on Update license.**

   The yellow highlighted line displays the activation key in the **Activation code** column.

   ![Activation Code Image]

9 **Enter the activation key in Transit/TermStar in the Activate software window:**
   - Select the activation key in the Activation Center and copy this to the clipboard (CTRL+C).
   - Copy the activation key from the clipboard in Transit/TermStar to the **Enter the activation key from the Activation Center** field (CTRL+V).

10 **Click on Activate.**

   Transit/TermStar displays the following message:

   ![Activate Message]

11 **Read through the message carefully and select OK to confirm.**

   Transit/TermStar is now activated on the modified computer, meaning that you can work without restrictions.

12 **Log out of the Activation Center. To do this, click on Log out.**
Forgotten your password?

If you have forgotten your password for the Activation Center, you can have it sent to you:

1  In the log-in window, click on **Forgot password?**.
   The Activation Center displays the following window:

   ![Activation Center login window]

2  Enter the user name and e-mail address with which you are registered at STAR.
   – You can find the user name in the e-mail containing the licence information that you received from STAR.
   – The registered e-mail address is the address to which the licence information was sent.

3  Click on **Send password**.
   The Activation Center sends the password to the e-mail address that you entered. If you do not receive the e-mail immediately, check your spam folder in case the e-mail has been sent there.
